

# HERBICIDE PRODUCTS

## **Accord Concentrate**

It is a water-soluble liquid that mixes readily with water and nonionic surfactant to be applied as a foliar spray for the control or destruction of many herbaceous and woody plants. It is intended for control of annual and perennial weeds and woody plants in forests, utility rights of way, including aquatic areas and wildlife habitat areas within these sites.

(Dow AgroSciences) 2 ½, 15, 30 & 120 gallon

## **Accord XRT II**

For control of annual and perennial weeds and woody plants in non-crop areas and industrial sites, forests, habitat management areas, railroads, roadsides and other similar sites.

(Dow AgroSciences) 2 ½, 15, 30 & 120 gallon

## **Arsenal Powerline**

It is an aqueous solution to be mixed with water and surfactant and applied as a spray solution to non-cropland areas such as railroad, utility, pipeline and highway rights of way, utility plant sites, petroleum tank farms, pumping installations, fence rows, storage areas, non-irrigation ditch banks, and other similar areas. For maintenance of non-cropland sites described above, ARSENAL herbicide may be applied to non-irrigation ditches and low lying areas when water has drained but may be isolated in pockets due to the uneven or unlevel conditions. ARSENAL herbicide is recommended for the establishment and maintenance of wildlife openings.

(BASF) 1 quart, 2 ½, & 15 gallon

## **Cambistat**

It is for the reduction of terminal growth and pruning volume in trees, not used for food production on sites such as utility rights of way, urban environments, residential areas and non-crop areas.

(SePro) 1 gallon

## **Clearcast**

It is for the control of aquatic weeds in ponds, lakes, reservoirs, seeps, canals, streams, swamp, marshes, bogs, irrigation ditches, transitional areas between terrestrial and aquatic sites, and seasonal wet areas.

(BASF) 1 gallon

## **Confront**

Confront Specialty herbicide is a broad-spectrum weed killer for control of broadleaf weeds in established cool season and warm season turf grass.

(Dow AgroSciences) 1 gallon

## **Crossbow**

For the control of most kinds of unwanted trees and brush, as well as annual and perennial broadleaf weeds on rangeland, permanent grass pastures, conservation reserve program (CRP) acres, fence rows, non-irrigation ditch banks, roadsides and other non-crop areas and industrial sites.

(Dow AgroSciences) 1 & 2 ½ gallon

## **Custom Blends**

Custom Blended Herbicides are available upon Client's Request and Specification. Packaged in 15, 120, 350 gallon returnable

**Direx 4L**

It is a liquid form of Diuron to be mixed in water and applied as a spray for selective control of weeds in certain crops and for nonselective weed control on non-cropland areas.

(DuPont) 2 ½ gallon

**Envoy**

It is a selective postemergence herbicide for the control of annual and perennial grasses. Used primarily on tree farms, ornamental and non-crop areas. For control of grasses around conifer trees, non-bearing food crops, ornamentals and non-crop or non-planted areas.

(Valent USA Corporation) 1 gallon

**Escort XP**

It is a dispersible granule that is mixed in water and applied as a spray. ESCORT XP controls many annual and perennial weeds and woody plants in non-crop areas and conifer plantations. Available in closed system returnable/refillable containers.

(DuPont) 2- 64 oz returnable

**Garlon 3A**

It is for the control of woody plants, broadleaf weeds and vines in forests and industrial non-crop areas, including manufacturing and storage sites, rights of way such as electrical power lines, communication lines, pipelines, roadsides, railroads, fence rows, non irrigation ditch banks, and around farm buildings; including application to grazed areas, and establishment and maintenance of wildlife openings on these sites, and in Christmas tree plantations. Use within production forests and industrial non-crop sites may include applications to control target vegetation in and around standing water sites such as marshes, wetlands, and the banks of ponds and lakes.

(Dow AgroSciences) 2 ½, 15, 30 & 120 gallon

**Garlon 4 Ultra**

New formulation with a caution label compared to the former formulation of Garlon 4 with a danger label. It is formulated using methylated seed oil, not a petroleum formulation. It is for the control of woody plants and broadleaf weeds on rights of way, industrial sites, non-crop areas, non-irrigation ditch banks, forests, and wildlife openings, including grazed areas on these sites.

Also Available in 15-gallon returnable/refillable container.

(Dow AgroSciences) 2 ½, 15, 30 & 120 gallon

**Habitat**

It is for the control of undesirable emergent and floating aquatic vegetation in and around standing and flowing water, including estuarine and marine sites. Applications may be made to control undesirable wetland, riparian and terrestrial vegetation growing in or around surface water when applications may result in inadvertent applications to surface water.

(BASF) 1 quart, 2 ½ & 15 gallon

**Hyvar X**

It is an effective general herbicide for the control of many annual weeds at low rates and perennial weeds at higher rates and is particularly useful for control of perennial grasses.

(DuPont) 12 x 4 lb

**Hyvar XL**

It is an effective general herbicide providing residual control of many annual weeds at low rates and perennial weeds and brush at higher rates. It is particularly useful for control of perennial grasses.

(DuPont) 1 gallon

**Journey**

It is an aqueous solution to be mixed with water and an adjuvant and applied as a spray solution to provide weed control on noncropland areas such as railroad, utility, pipeline, and highway rights-of-way, railroad crossings, utility plant sites, petroleum tank farms, pumping installations, non-agricultural fence rows, storage areas, non-irrigation ditchbanks, Conservation Reserve Program (CRP) land, prairie sites, airports, industrial turf, recreational and non-residential turf and other similar areas. It may be used for the release of unimproved common Bermuda grass, vegetation management prior to the establishment of certain native prairie grasses and wildflowers and for wildlife habitat management.

(BASF) 2 ½ gallon, 30 gallon

**Karmex XP**

Herbicide is a dispersible granule to be mixed in water and applied as a spray for selective control of weeds in certain crops and for non-selective weed control on non-cropland areas.

(DuPont) 10x5 lb, 25 lb

**Krenite S**

This Brush Control Agent is a water soluble liquid to be diluted with water and applied as a foliar spray for control and/or suppression of many woody species. It is recommended for use on non-cropland, including highway rights of way, industrial sites, railroad rights of way. Storage areas, utility and pipeline rights of way.

(DuPont) 2 ½, 15 & 180 gallon

**Krovar DF**

It is a dispersible granule to be mixed in water and applied as a spray for selective control of weeds in citrus and for non-crop weed control. Krovar I DF is not to be used in any recreational area or around homes. (DuPont) 8 x 6 lb, 25 lb

**Milestone VM**

For control of susceptible broadleaf weeds including many invasive and noxious weeds on non-cropland areas including industrial sites, rights-of way (such as roadsides, electric utility and communication transmission lines, pipelines and railroads), non-irrigation ditch banks, natural areas (such as wildlife management areas, wildlife openings, wildlife habitats, recreation areas, campgrounds, trailheads and trails), and grazed areas in and around these sites.

(Dow AgroSciences) 2 ½ & 15 gallon

**Milestone VM Plus**

For control of broadleaf weeds and woody plants in rangeland, permanent grass pastures, Conservation Reserve Program (CRP), and non-cropland areas including industrial sites, rights-of-way (such as roadsides, electric utility and communication and transmission and distribution lines, pipelines and railroads), fence rows, non-irrigation ditch banks, natural areas (such as wildlife management areas, wildlife habitats, recreation areas, campgrounds, trailheads and trails), and grazed areas in and around these sites.

(Dow AgroSciences) 2 ½ & 15 gallon

**Oust Extra**

It is a dispersible granule that is mixed in water and applied as a spray or impregnated on dry, bulk fertilizer. It controls many annual and perennial grasses and broadleaf weeds in conifer plantations and non-crop sites. It also may be used to control certain hardwoods and vines when applied in site preparation treatments.

(DuPont) 2-64 ounce

**Oust XP**

It is a dispersible granule that is mixed in water and applied as a spray. It controls many annual and perennial grasses and broadleaf weeds in forestry and non-crop sites.

(DuPont) 2-48 ounce

**Outrider**

It is a preemergence and postemergence systemic herbicide. It controls many annual and perennial weeds in non-crop sites. It is a selective herbicide and can be used over-the-top of many perennial grasses, such as; unimproved bahia grass, Bermuda grass and tall fescue. It can also be used to control Johnson grass in the following native grasses: big bluestem, bushy bluestem, little bluestem, buffalo grass, Indian grass, blue oats grama, side oats grama, love grass and switch grass. It is formulated as a water dispersible granule.  
(Monsanto) 10 x 20 ounce

**Overdrive**

It is a selective postemergence herbicide for the control of annual and biennial broadleaf weeds and control or suppression of many perennial broadleaf weeds in non-cropland sites, pasture, hay and rangeland sites. Examples of non-cropland sites include, but are not limited to railroad, utility, pipeline and highway rights of way, railroad crossings, utility plant sites, petroleum tank farms, pumping installations, non agricultural fencerows and airports.  
(BASF) 7.5 lb

**Pathfinder II**

A ready to use herbicide for the control of woody plants on forests; Non-crop areas including: industrial manufacturing and storage sites, rights of way and non-irrigation ditch banks; rangeland and permanent pastures; grazed areas and maintenance of wildlife openings.  
(Dow AgroSciences) 2 ½ gallon

**Pathway**

For controlling unwanted trees via cut surface treatments in forests and non-cropland areas such as fencerows, roadsides, and rights of way.  
(Dow AgroSciences) 2 ½ gallon

**Patron 170**

It is a woody plant herbicide for controlling mixed brush on utility rights of way, highways, drainage ditch banks, fencerows, and solid stands of oak or elm. It also controls noxious perennial weeds on non-cropland.  
(Riverdale) 2 ½ & 30 gallon

**Pendulum Aqua Cap**

It is recommended for preemergence control of grasses and certain broadleaf weed species as they germinate on non-cropland areas and non-residential turf sites. Examples of such sites include, but are not limited to: grounds or lawns around establishments, military and other institutions, parks, roadsides, schools, picnic grounds, athletic fields, houses of worship, cemeteries, golf courses, prairie grass areas and sod farms.  
(BASF) 2 ½ & 30 gallon

**Plateau**

It is for weed control, native grass establishment, and turf growth suppression on pastures, rangeland and non-crop areas.  
(BASF) 1, 2 ½ & 15 gallon

**Pramitol 25E**

For total vegetation control on industrial sites, non-crop areas, around the farm, and for use in and under asphalt. Use only where complete control of all vegetation is desired. Pramitol will inhibit plant growth for multiple years. Apply before weeds emerge for best results. Use precaution near desirable plants or where chemical may run off.  
(Agrilience) 1, 2 ½ & 30 gallon

### **Pumps**

Electric and Manual pumps are available for the returnable containers. Please check the equipment information section or contact your representative from TCD.

### **Quick Pro**

It is a postemergent, systemic herbicide with no soil residual activity and 24 hour burn down. It gives broad-spectrum control of many annual weeds, perennial weeds, woody brush and trees. It is formulated as a water-soluble liquid containing surfactant and no additional surfactant is needed or recommended.

(Monsanto) 1 ½ oz packet, 6.8 lb jug

### **Reward**

Provides fast control of broadleaf and grassy weeds in industrial, recreational, golf course, commercial, residential and public areas. Controls unwanted weed growth in 24 to 36 hours. Maybe used in landscape and aquatic edges and non-flooded portions of ponds, lakes and ditches.

(Syngenta) 1 & 2 ½ gallon

### **Rodeo**

It is a water-soluble liquid that mixes readily with water and nonionic surfactant to be applied as a foliar spray for the control of many herbaceous and woody plants.

(Monsanto) 2 ½ & 30 gallon

### **Roundup Pro**

It is a postemergent, systemic herbicide with no soil residual activity. It gives broad-spectrum control of many annual weeds, perennial weeds, woody brush and trees. It is formulated as a water-soluble liquid containing surfactant and no additional surfactant is needed or recommended.

(Monsanto) 2 ½ gallon

### **Sahara**

It is a dispersible granule to be mixed with water and a spray adjuvant and applied as a spray solution to non-cropland areas such as railroads, utility, pipeline and highway rights-of-way, utility plant sites, petroleum tank farms, pumping installations, fence rows, farmyards, and around farm buildings, storage areas, non-irrigation ditch banks, and other similar areas where bare ground is desired. Sahara may also be used for weed control under paved surfaces.

(BASF) 10 lb, 40lb

### **SpraKil 26**

It is a granular non-selective herbicide for controlling a wide range of annual and perennial weeds and grasses. It is recommended only for non-crop areas such as railroad rights of way and industrial areas. For vegetation control by broadcast (aerial and ground equipment) and banded applications.

(SSI Maxim) 6 lb jug, 40 lb bag, 40 lb pail

### **SpraKil SK-5**

It is a granular formulation for brush control. It is an extremely active herbicide, which will control trees, shrubs and other forms of unwanted vegetation.

(SSI Maxim) 6 lb jug, 40 lb pail

### **SpraKil SK-13**

It is a granular formulation, non-selective herbicide for total vegetation control.

(SSI Maxim) 6 lb jug, 40 lb pail

**Solution**

2, 4-D in a dry formulation. It is for control of many broadleaf weeds in non-crop areas, lawns, and ponds; ditch banks, pastures and rangelands.  
(Riverdale) 45 oz

**Sonar**

An aquatic herbicide effective against a variety of aquatic plants, submersed, emergent, and floating (including duckweed and watermeal). Provides excellent season-long control with an early spring application prior to or just after plant growth begins. No restrictions on water use for fishing, swimming, or domestic use following application according to label instructions.  
Application rates vary from .16 to 1.5 quarts per acre.  
(Aquatic), (SePro) 1 quart, 1 gallon, 40 lb pail, 30 lb pail

**Spike 20P**

A surface applied soil active product for control of woody plants. Treatments become effective after sufficient rainfall has occurred to move the active ingredient into the root zone.  
(Dow AgroSciences) 25 lb bag

**Spike 80DF**

It is a preemergence and postemergence herbicide for total control of brush and weeds. Spike 80DF will kill trees and shrubs. Use caution when applying this product.  
(Dow AgroSciences) 4 lb bag, 25 lb bag

**Stalker**

It is an emulsifiable concentrate mixable with water, diesel oil, or recommended seed oils and penetrating oils. To be applied as a spray to cut stumps and frilling cuts for the control of brush.  
(BASF) 1 quart, 30 gallon

**Surf Plus 584**

To be used in conjunction with Plateau: a unique blend of highly refined soybean based spray oil and nonionic surfactants.  
(TCD) 1 gallon

**Telar XP**

It is a dry flowable that is mixed in water and applied as a spray to control many invasive and noxious broadleaf weeds in pasture, range, Conservation Reserve Program (CRP) lands, and non-crop industrial sites. These non-crop industrial sites include airports, military installations, fence rows, roadsides and associated rights of way, lumberyards, petroleum tank farms, pipeline and utility rights of way, pumping installations, railroads, storage areas and plant sites, including governmental and private lands.  
(DuPont) 2- 64 ounce

**Topsite**

Recommended for control of many annual and perennial grasses and broadleaf weeds on non-cropland areas such as railroad, utility, pipeline and highway rights of way, petroleum tank farms and other similar areas.  
(SSI Maxim) 8 x 6 lb, 40lb pail

**Tordon 101**

A water soluble weed and brush herbicide for control of annual and perennial broadleaf weeds, woody plants, and vines on non-crop areas including forest planting sites, industrial manufacturing sites, rights-of-way, such as electric power lines, communication lines, pipelines, highways, railroads; and wildlife openings in forest and non-crop areas.  
Rate of .5 gallon to 2 gallons per acre.  
(Dow AgroSciences) 2 ½, 15 & 30 gallon

**Tordon K**

Restricted use pesticide for control of annual and perennial broadleaf weeds, woody plants, and vines on non-crop areas including forest planting sites, industrial manufacturing sites, rights of way such as electrical power lines, communication lines, pipelines, roadsides, railroads, and wildlife openings in forest and non-crop areas.

(Dow AgroSciences) 2 ½, 15, 30 & 120 gallon

**Transline**

For selective control of broadleaf weeds in non-cropland areas, industrial manufacturing and storage sites, rights of way, and wildlife openings, including grazed areas on these sites, tree plantations, rangeland and permanent grass pastures.

No grazing or haying restrictions. Excellent control of thistle, teasel, and other broadleaf weeds.

Use of NU-FILM will improve results of weed control

(Dow AgroSciences) ½ & 2 ½ gallon

**Trimec Classic**

Trimec Classic controls dandelion, chickweed, knotweed, plantain, henbit, spurge and many other species of broadleaf weeds. Apply from 1.2 to 1.5 oz per 1,000 square feet.

(PBI Gordon) 2 ½ gallon

**Triplet SF**

It is for selective broadleaf weed control for turf grasses including use on sod farms. It controls dandelion, clover, henbit, plantains, wild onion, and other broadleaf weeds.

(Riverdale) 2 ½ gallon, 30 gallon

**Velpar L**

A water dispersible liquid that is mixed in water and applied as a spray for weed control in certain crops, Christmas trees, forestry site preparation and release areas, and industrial areas. It may also be applied undiluted as a basal soil treatment for brush control in reforestation areas, rangeland, pastures and non-crop areas, or by stem injection for brush control.

(DuPont) 2 ½ & 15 gallon

**Veteran 720**

A water-soluble industrial herbicide for control of brush and broadleaf weeds on rights of way, forest brush, fencerows, non-irrigation ditch banks, wasteland, and non-cropland areas. Use Nu-FILM-IR for increased control of Veteran on unwanted brush and broadleaf weeds.

(Riverdale) 2 ½ & 30 gallon

**Vista**

It is for the selective postemergence control of annual and perennial broadleaf weeds and woody brush in: non-cropland areas including industrial sites, non-irrigation ditch banks, and rights of way such as electrical power lines, communication lines, pipelines, roadsides, and railroads including grazed areas within these sites and pine plantations.

(Dow AgroSciences) 2 ½ gallon

**Westar**

It is a dispersible granule for control in non-crop sites and forestry. Provides both contact and residual control of many annual and perennial weeds. Caution should be exercised when applying Westar near desirable trees and shrubs

(DuPont) 12 lb container
